Crews starting on the top bunglines warm up on the top stretch.
Crews starting on the bottom bunglines warm up on the bottom stretch.
Crews who have bumped out return to warm-up circulation.

Crews may spin wherever they like provided it is safe and they do not cause obustruction to river traffic.
Crews warming up on the top stretch must not spin below their bungline.
Powered or large river traffic should proceed along the centre of the river. They may be asked to hold at the temporary mooring points until a division has passed.
